STATEMENT OF OBJECTIVES -

The objectives of the James N. Kirby Foundation have been formulated on a broad charitable and community welfare basis. The Foundation's overall goal is to distribute grants to charitable, educational and technical bodies throughout Australia in the areas of health, education, technology and science, art, literature, the environment, conservation, maintenance and development of Australia's natural resources, with particular attention being given to technical education projects to assist young Australians achieve their highest standards.

The logo for the James N. Kirby Foundation was derived from the armorial bearing designed for Sir James when he received his Knighthood in 1962, and is seen in its entirety here. Sir James wished to incorporate an Australian theme alongside references to his love of fishing and manufacturing, as well as his interest in nuclear energy.

The final design shows a Marlin rising from the waves and incorporates references to manufacturing in the form of two Millrinds (a heraldic representation of support unit stands for grinding wheels) plus nuclear energy through two atoms of Helium circling in their elliptical paths. The Australian element is revealed through the incorporation of a boomerang above the words "Ngaben Bidjigarme" - an aboriginal expression in the Arnhem Land language, still spoken today. It literally translates as "I all hands hold" the nearest meaning to "I serve all".

It is with the greatest of pleasure that I present the 2008 Chairman's Report. As we enter the 41st year of the James N. Kirby Foundation we have reached a milestone with our donations exceeding the \$1,000,000 mark. The Foundation has today donated nearly 12 million dollars to causes in medical and research, education, the environment, social welfare and art.

The various progress reports from recipients of grants from the Foundation certainly give encouragement and illustrate the benefits the donations provide. Two such organisations which have shown their sincere appreciation and are further highlighted on the website are the Sydney Institute of Marine Science (SIMS) and CareFlight. The grant to SIMS assisted in the purchase of its first research vessel. This will provide marine researchers and post-graduate students' easy access to their study sites to carry out monitoring, sampling and diving activities. The grant to CareFlight assisted in sending a pilot and crewman for 'Pilot and Aircrewman Simulator Training'. CareFlight is Australia's only medical emergency pre-hospital trauma service to employ its own doctors, all of whom are specialists or senior trainees in critical care.

The audited financial statements of the Foundation for the year ended 30 June 2008 are presented in this Annual Report and in the opinion of the Directors of the Trustee, these statements are properly drawn up so as to give a true and fair view of the state of affairs of the Foundation and its results for the year ended on that date, and are in accordance with applicable Accounting Standards and the Trust Deed dated 17 October 1967.

The Foundation's gross income for the year ended 30 June 2008 was \$1,718,059 (2007 \$1,781,483) including donations received of \$500,150 (2007 \$475,000) with \$1,100,500 (2007 \$940,500) paid in grants during the year.

Since its inception in 1967, grants and donations totalling \$11,783,102 (2006/2007 \$10,682,602) have been made by the Foundation. These fall into the following categories:

Category	2007/2008 \$	Total to 30 June 2008 \$	%
Medical and Hospital	178,500	2,239,399	19
Education, Technical and Management	444,500	4,907,912	41
Environment and Natural Resources	128,500	315,200	3
Social Welfare and Art	353,000	4,320,591	37
	1,100,500	11,783,102	100

During the year, the Foundation approved grants totalling \$984,000 allocated for payment as follows:				
	Approved	Approved	Total	Forward
	This Year	Previous Years	Approved	Commitments
	\$	\$	\$	\$
2007/2008	942,000	158,500	1,100,500	-
2008/2009	26,000	51,000	77,000	77,000
2009/2010	16,000	-	16,000	16,000
	984,000	209,500	1,193,500	93,000

An increasing number of applications were received during the year and regrettably denied for no other reason than a limitation to the Foundation's resources. The Directors believe that the available funds of the Foundation have been appropriated in accordance with the objectives formulated on a broad charitable and community welfare basis. At the end of this Annual Report, details as to how to apply are found and the Foundation welcomes applications from the various areas mentioned. Consideration is only given to applications that fully comply with the requirements for applications and are accompanied by the Australian Taxation Office's Endorsement as a Deductible Gift Recipient. The contents of that letter should also confirm the status of the organisation as falling under Item 1 of the table in Section 30-15 of the Income Tax Assessment Act 1997.

The many reports received from recipients of financial assistance, letters of thanks and progress reports in regard to the various projects undertaken, together with special acknowledgments such as plaques and certificates of recognition and appreciation are always greatly appreciated.

In accordance with the Articles of the Trustee Company, Emeritus Professor Christine E Deer, Emeritus Professor Sir Rupert Myers KBE AO FTSE FAA, Dr Brian W Scott AO and Mr David W Smithers AM retire as Directors of the company but being eligible have offered themselves for re-election at the trustee company's Annual General Meeting.

I acknowledge and extend my sincere thanks and appreciation to the Directors for their guidance and assistance in allocating the income of the Foundation as a great deal of analysis is required to properly evaluate requests that are received. We also appreciate the contributions made by our honorary solicitor, Mr Ken Ramsay and our honorary auditor, Mr Alan Neilson.

Finally, we have been fortunate this year to have secured the services of Kay McDowall as our Executive Assistant. Kay is responsible for the administration of the Foundation including grants. We appreciate and acknowledge her wonderful contribution during the year.

Raymond J Kirby AO - Chairman of Trustee Directors

GRANTS MADE: THE YEAR IN REVIEW ———

2008

Kalamurina: Linking Lake Eyre to the Simpson Desert

Australia's wildlife is facing an extinction crisis: 22 mammals have been lost in the last 200 years. A further 1,500 species of plants and animals and 3000 ecosystems are currently threatened with extinction. Clearly, urgent action is needed if we are to save Australia's remaining wildlife.

Australian Wildlife Conservancy (AWC), an independent, non-profit organisation, is dedicated to the effective conservation of all Australian animal species and their habitats. AWC achieves its mission by buying land and creating sanctuaries and by taking a practical approach to land management, such as feral animal control, fire management and weed eradication programs, underpinned by a commitment to sound science.

In 2007, AWC secured an opportunity to purchase Kalamurina and create the largest non-government nature reserve in the world. Kalamurina covers a remarkable 667,000 hectares (nearly 1.7 million acres) stretching from the northern shore of Lake Eyre to the southern boundary of the Simpson Desert. By connecting these reserves, the acquisition of Kalamurina creates a single protected area in central Australia that is larger than the entire state of Tasmania.

The property also hosts the confluence of three of central Australia's most important rivers: Kallakoopah Creek converges with the Macumbah and Warburton rivers before flowing into Lake Eyre. The stunning diversity of resulting arid-zone ecosystems provide a haven for a wealth of desert wildlife, including several threatened species, such as the Ampurta, and regionally endemic species like the Lake Eyre Dragon.

AWC is extremely grateful for the timely support of the James N. Kirby Foundation who granted \$7500 to AWC, thus contributing to the purchase and management of 4167 acres of Kalamurina. Indeed, this was the second time the James N. Kirby Foundation has supported AWC: in 2006 it generously contributed \$15,000 towards the purchase and management of AWC's Wongalara Sanctuary, an area of pristine wilderness on the edge of Arnhem Land.

Kalamurina is a remarkable project - one that is playing a vital role in reversing the tide of extinctions engulfing Australia's desert wildlife and in ensuring their protection for future generations of Australians.

Jun Chadlane

Shauna Chadlowe - Development Executive, Australian Wildlife Conservancy

Some of our grant recipients have graciously contributed to our report by outlining the application of their grant from the Foundation. These insights are reproduced on the following pages as 'The Year in Review'.

Back on Track program

IAMES AND TEACHER RECONNECTING VIA THE INTERNET AND WEB CAM 'VIRTUAL CLASSROOMS'

The Bone Marrow Donor Institute is a not-for-profit organisation established in 1989, providing care, treatment and support for cancer patients and their families and funding research into find a cure for leukaemia and other cancers.

Thousands of Australian children are battling cancers which often require long term treatments such as radiotherapy, chemotherapy or even a bone marrow transplant. These intensive treatments require long recovery periods in hospital and at home, some children can be away from school for 2 years or longer. They lose touch with their school, teachers and peers they become isolated and their social development is hindered, often resulting in negative psychological and emotional impacts.

The Back on Track program reconnects children suffering from cancer to their school, teachers and peers using technologies such as the internet and web cam 'virtual classrooms'. The program eases the integration back into school life for these children.

The \$15,000 provided by the James N. Kirby Foundation has given three children living with cancer the opportunity to participate in the Back on Track program, giving them another focus other than their illness. The funding also ensured that they were given an opportunity to reach their full potential, educationally, socially and physically despite their illness.

Ellett

Sophia Elliott - Director Marketing and Development

Lake Macquarie Outdoor Recreation Centre

The Crusader Union of Australia was delighted to receive funding of \$15,000 from the James N. Kirby Foundation towards kitchen improvements at our Lake Macquarie Outdoor Recreation Centre.

The Centre's kitchen was built and fitted out in the 1950's and currently caters to over 4,835 campers each year. The result of such use is that it suffered significant wear and tear with the various facilities becoming unreliable, unsafe and in vital need of replacing.

The generous funding provided by the James N. Kirby Foundation enabled Crusaders to purchase and install a new industrial dishwasher, as well as replace the old wooden shelving and benches with stainless steel shelving and surfaces.

The positive impact of this upgrade has been considerable. Staff and volunteers now have a safe and reliable working environment. New equipment is ensuring a more hygienic environment for food preparation and minimising water wastage, and Crusaders are ensuring compliance with increasingly stringent health and safety standards imposed on public kitchens.

We would like to sincerely thank the James N. Kirby Foundation for making this upgrade possible. Their assistance has enabled us to continue to provide thousands of children and young people with a positive and safe camping experience.

Jona Wlood

Anna Wood - Marketing and Development Director

THE INDIGENOUS AUSTRALIAN ENGINEERING — SUMMER SCHOOL

Engineering Aid's principal program

STUDENTS INSPECTING AN F18 HORNET JET FIGHTER AT RAAF BASE, WILLIAMTOWN

The Summer School is the principal program of Engineering Aid on behalf of Indigenous young Australians and has been supported by The James N. Kirby Foundation since the first hosted by the University of Sydney in 1998. Since then it has been conducted in January each year and hosted by either The University of Newcastle or University of New South Wales.

The Summer School aims to encourage Indigenous young Australians in Years 10, 11 and 12 to consider careers in Engineering and help address the under-representation of Indigenous people in the Engineering Profession.

Students from throughout Australia attend the Summer School without cost to themselves. All expenses, including student travel and accommodation, are paid out of contributions made by Sponsors and Donors including

the Foundation. Engineering Aid also assists with cadetships and other financial support for students wishing to study Engineering and provides Educational Grants to enable students to complete their Year 12 studies.

During the Summer School students stay on the campus of the host university; meet Engineers and other role models; visit engineering projects; learn about the various branches of Engineering; and how students who become Engineers might contribute to the benefit of their communities.

The Summer School has been described as unique. It has been acknowledged that 23 of the Summer School's alumni have graduated as Engineers. Others have gone on to study Medicine, Law, Commerce, Dentistry, Teaching, etc.

The Patron of Engineering Aid and the Summer School is former Prime Minister, the Hon Bob Hawke AC. It is a philanthropic organisation that provides engineering and related services to assist disadvantaged communities both in Australia and overseas.

Engineering Aid greatly appreciates the support of The James N. Kirby Foundation. It has been instrumental in helping its aim of inspiring Indigenous young Australians to enter the professions, including Engineering.

Jeff Dobell - Director, Engineering Aid

Specialised equipment provides independence

Support provided by the James N. Kirby Foundation has made a difference to the lives of our members living with MND. The Motor Neurone Disease Association of NSW received funding to purchase new equipment to assist us to meet the needs of our members living with motor neurone disease (MND) who require special equipment to continue to live at home with minimal discomfort and to maintain their independence. One of the major roles of the MND Association of NSW is providing, or facilitating the provision of equipment to people with MND at no cost.

As the motor neurone disease progresses voluntary muscles, that controls our ability to move around, speak, TILT-IN-SPACE ELECTRIC WHEELCHAIR breathe and swallow, fail to work normally. With no nerves to activate them, muscles gradually weaken and waste. The patterns of weakness vary from person to person. All muscles can be affected including speech and swallowing muscles resulting in a gradual weakening of the voice leading to an inability to communicate verbally. MND is a fatal disease where the average time from diagnosis to death is 27 months.

Few people with MND are in the financial position to sustain the cost of the type of equipment that may be very beneficial but appropriate for only a limited period of time. This applies particularly to these "high-tech", high cost communication devices and electric wheel chairs. The Light writer is a communications device that has simple type & talk technology. There are 8 different voice outputs to allow it to be customized to suit, male, females, young, middle aged and elderly. This equipment provides the person living with MND the ability to be able to maintain communication with their loved ones and to retain some independence when independence is gradually made harder by the progression of the disease. Tilt-In-Space electric wheelchairs are the high cost; high function power chairs which most of our members will require the use to enable ongoing mobility and increased comfort in the intermediate and later stages of MND. These electric wheelchairs allow the user to recline/tilt back, elevate legs, supporting upper body and neck muscles. Some of our members even sleep in these chairs during the day. The chairs enable mobility, pressure relief and independence.

We would like to sincerely thank the James N. Kirby Foundation for assist us to improve the quality of life for people living with MND.

Xyn Niber

Kym Nielsen - Fundraising Manager

The development of essential skills

STUDENTS WITH ROBERT JUNIPER'S DEEP SEA ANGLER FISH, BONDI 2007 (PHOTO JAMIE WILLIAMS)

The generous support of the James N. Kirby Foundation has allowed Sculpture by the Sea to develop and deliver a quality education program to an increasingly diverse audience. The education program coincides with our exhibitions held annually at Bondi, in Sydney and Cottesloe Beach, in Perth. We are also developing and delivering sculpture workshops throughout the year at Headland Park, in Sydney.

The Sculpture by the Sea Education Program facilitates the development of essential skills for all students. The combination of unique and iconic coastal locations, the involvement of practicing visual artists and its broad accessibility makes the Sculpture by the Sea Education Program truly unique in the sphere of visual arts education.

The funding that was provided by the James N. Kirby Foundation has enabled us to develop the following program components:

- Highly interactive onsite sculpture workshops designed to heighten students' appreciation of sculpture and to teach new skills in three-dimensional form;
- Study Tours which allow students to interact directly with the exhibiting artists, gaining a unique insight into their practice;
- Professional development opportunities for teachers including practical art making activities and techniques that can be taken back into the classroom, as well as a stimulating preview of the exhibition, enabling them to meet with some of the exhibiting artists; and
- Education resources including the Kid's Guide, an on-line Education Kit and website information highlighting exhibiting artists and their practice.

Louise Halpin - Education and Conference Manager

Home of our own

TAD's long-held dream of a home of our own has been realised. We have purchased and occupied a well equipped unit in a new industrial complex in Northmead, known as TADHouse.

For 30 years, TADNSW leased premises from the Royal Rehabilitation Centre Sydney (RRCS) at minimal cost. When the RRCS property was scheduled for redevelopment, we began the long search for new premises. At the same time, increasing client demands for service were such that we had outgrown our space. Workshop and warehouse spaces were in critically short supply. We needed to have the ability to expand our operations, so that we could better meet the needs of people with disabilities.

In 2002, TAD Foundation launched the TADHouse: Reaching New Heights campaign to raise funds for a new building.

In 2007, after a lengthy search, we purchased two industrial units at Northmead for \$2.43 million (excluding GST) and renewed our call for support. The campaign (with its subsequent earnings) raised over \$2.5 million and our long-held dream became a reality in January 2008 when we finally moved in to our new home.

The larger unit has an area of almost 1000 sq m and has been immediately occupied by TADNSW. It provides much needed space for the delivery of our services: Custom Designed Aids, FREEDOM WHEELS® Modified Bike Service, the TAD Gale Computer Loan Service and the George Winston Communication Service.

The purchase of TADHouse provides TADNSW with a permanent home where we can continue our important and highly specialised work, providing personalised equipment and advice, to people with disabilities and their carers, through the innovative services of skilled volunteers and staff.

Our special thanks and appreciation go to The James N. Kirby Foundation, whose generous donation and support of TADNSW helped us to realise our dream of TADHouse. A plaque in our warehouse recognises this contribution - "Docks and Building Services: With Thanks to the James N. Kirby Foundation".

The key to bringing Shakespeare to life

Actors Bringing Shakespeare to Life for Students

Bell Shakespeare's Education flagship programme, Actors At Work, is the Company's longest standing education initiative. The programme tours to every state and territory, from capital cities to regional centres and rural communities, reaching over 60,000 students each year.

Our three teams of four young and dynamic actors tour to schools and, with minimal sets and props, deliver a one-hour performance to up to 250 students followed by a question and answer session. Every year these professional actors bring live performance into schools, creating a unique opportunity for students to hear Shakespeare's rich language, see timeless characters come to life and appreciate how his characters' dilemmas resonate with their own view of the world around them.

In 2008 Actors At Work explored five of Shakespeare's most frequently studied plays in three different programmes, engaging, entertaining and challenging students with classic characters ever-present in our world today. "The Conspirators" looked at the role of conspiracy in Julius Caesar and Othello, and how the driving forces of these characters are evidenced in bullying, peer pressure and gang formation in our schools. Younger students relished the magic and laughter in "Love's Magic" using scenes from Romeo And Juliet and A Midsummer Night's Dream, whilst our popular "Macbeth Intensive" programme returned with additional scenes to enhance students' exploration of the Scottish play. Now in its eighteenth year, Actors At Work is the key to bringing Shakespeare to life for students in 2008.

The generous funding provided by the James N. Kirby Foundation enabled us to provide the costumes, props, banners and road cases in 2008 for two of our three teams of actors for their national tours.

FOUNDATION -Sheet JNE 2008

——— James N. Kirby Foundation —— Independent Audit Report to the Trustee

——— James N. Kirby Foundation —— Independent Audit Report to the Trustee

AUDIT OPINION

In my opinion, the financial report of James N. Kirby Foundation:

- gives a true and fair view of the financial position of James N. Kirby Foundation as at 30 June 2008 and of its financial performance for the year ended on that date; and
- is presented in accordance with the recognition and measurement principles of applicable Accounting Standards and the Trust Deed dated 17 October 1967.

This opinion must be read in conjunction with the rest of my audit report.

Scope

THE FINANCIAL REPORT AND TRUSTEE'S RESPONSIBILITY

The financial report is a special purpose financial report and comprises the balance sheet and income statement for James N. Kirby Foundation (the trust) for the year ended 30 June 2008.

The trustee of the trust is responsible for the preparation and true and fair presentation of the financial report in accordance with the Trust Deed. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

Audit Approach

I conducted an independent audit in order to express an opinion to the trustee of the trust. My audit was conducted in accordance with Australian Auditing Standards, in order to provide reasonable assurance as to whether the financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

I performed procedures to assess whether in all material respects the financial report presents fairly, in accordance with the recognition and measurement principles of applicable Accounting Standards and the Trust Deed, a view which is consistent with my understanding of the trust's financial position and performance.

I formed my audit opinion on the basis of these procedures, which included:

- examining, on a test basis, information to provide evidence supporting the amounts in the financial report, and
- assessing the reasonableness of significant accounting estimates made by the trustee or management of the trust.

My procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

While I considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of my procedures, my audit was not designed to provide assurance on internal controls.

My audit did not involve an analysis of the prudence of business decisions made by the trustee or management of the trust.

INDEPENDENCE

In conducting my audit, I followed applicable independence requirements of Australian professional ethical pronouncements.

Dated at Sydney the sixteenth day of October 2008

Alan S Neilson - Chartered Accountant

— JAMES N. KIRBY FOUNDATION ———— Requirements for Applications

OBJECTIVES:

The objectives of the James N. Kirby Foundation have been formulated on a broad charitable and community welfare basis. The Foundation's overall goal is to distribute grants to charitable, educational and technical bodies throughout Australia in the areas of health, education, technology and science, art, literature, the conservation, maintenance and development of Australia's natural resources, with particular attention given to technical education projects to assist young Australians achieve their highest standards.

Eligibility Criteria

- 1. Applications will not be considered unless accompanied by the letter referred to in paragraph (a) below.
 - (a) The Foundation is only empowered to make grants to entities that have *Endorsement as a Deductible Gift Recipient* as evidenced by a letter to that effect from the Taxation Office. The contents of that letter should also confirm the status of the organisation as falling under Item 1 of the table in Section 30-15 of the Income Tax Assessment Act 1997
 - (b) The application will be rejected if the applicant is not endorsed as a Deductible Gift Recipient or has tax deductible status under Item 2 of the table in Section 30-15 of the Income Tax Assessment Act 1997.
- 2. The Foundation is not empowered to assist individuals.
- 3. The Foundation does not assist projects or entities outside Australia.
- 4. Grants are assessed on their proximity to the stated objectives above.

Annual Level of Funding Available

Approximately \$1,100,500 annually over all fields of interest.

Size of Grants (2008)

Minimum Grant	\$3,000
Maximum Grant	\$100,000
Average Grant	\$ 10,000

Grants made and continuance of annual funding are subject to

- i. the recipient retaining tax status as a Deductible Gift Recipient
- ii. funds being applied specifically for the purposes as outlined in the original application
- iii. recipients providing a report annually as to how the funds have been applied, and
- iv. the recipient entering into a 'Conditions of Grant Agreement', incorporating (i) to (iii) above (a copy of which is available on request).

Requirement for Matching of Funds by Applicant

No requirements.

PROJECT DURATION

There is no time limit placed on the duration of grants.

CLOSING DATE

Consideration will only be given to applications received prior to 30 September each year.

SUBMIT APPLICATIONS TO

All applications to be made online at www.kirbyfoundation.com.au Any queries regarding applications, please contact Kay McDowall on (02) 9212 2711.
